Summary

Data Engineer with a strong foundation in Python, SQL, and modern cloud platforms. Experienced in building scalable ETL pipelines, data models, and analytics-ready datasets using Snowflake, dbt, and AWS. Strong focus on performance optimization and data quality.

Skills

Programming & Querying: SQL, Python

Data Engineering: AWS, Snowflake, dbt, ETL Pipelines, Data Modeling

Data Visualization Tools: Advanced MS Excel, Power BI

Tools: Git, GitHub, Jupyter Notebook, MySQL, MS Office

Experience

RPA Intern

Nov 2024 – Mar 2025

Employability.life (Remote)

Tools Used: UiPath Studio, Excel, OCR

- Developed and deployed end-to-end automation workflows using UiPath Studio, leveraging control flows, variables, and reusable components to streamline repetitive business processes.
- Automated web-based data entry by integrating Excel datasets with browser automation, ensuring accurate, efficient, and structured data submission.
- Designed intelligent document processing solutions using OCR, Taxonomy Manager, and Form Extractor to extract and transform PDF data into structured Excel reports.
- Built automation pipelines for email monitoring, attachment handling, and Excel-based reporting, improving operational efficiency and enabling data-driven decision making.

Projects

Airbnb Data Engineering Pipeline | *Snowflake, dbt, AWS, Python*

Jan 2026 – Feb 2026

- Built a scalable Medallion Architecture pipeline (Bronze → Silver → Gold) to process Airbnb listings, bookings, and hosts data from AWS S3 into Snowflake, ensuring structured and analytics-ready datasets.
- Implemented dbt transformations including incremental models and SCD Type 2 snapshots, while designing fact tables and One-Big-Table (OBT) models with lineage tracking, testing, and dependency management.
- Optimized data pipelines using Snowflake warehousing, clustering, and ephemeral models while enforcing data quality checks (unique, not-null, referential integrity, business rules) for efficient and trustworthy analytics.

Sales & Shipment Analytics | *Power BI, DAX, SQL, Excel*

Oct 2025 – Dec 2025

- Modeled and analyzed global sales and shipment data, improving reporting efficiency by 40%, and built advanced DAX KPIs including MoM (+12%), YoY (+18%), and ~27% profit margin for performance tracking.
- Designed an interactive Power BI dashboard with drillthrough, slicers, and dynamic KPI switching, reducing manual analysis time by 35% and enabling faster regional and product-level insights.
- Discovered key business trends such as 22% higher profits in top regions and 15% logistics cost variance, supporting data-driven decisions for shipping optimization and forecasting.

Awards & Certifications

- **NPTEL Certifications 2025 – Python Programming, IoT Cloud Computing:** Completed coursework in programming, embedded systems, communication protocols, and cloud architecture.
- **Cyber Security Fundamentals – Zscaler:** Gained practical knowledge of networking concepts, security principles, threat detection, and secure system design.
- **Best Final Year Project – 2025, PES College:** Qualified for the final round for developing an IoT-Based Automatic Water Monitoring System featuring real-time monitoring, analytics.

Education

B.E. Information Science & Engineering

Graduated: 2025

P.E.S. College of Engineering, Mandya

CGPA: 7.79 / 10
